

## The AirClic Fusion<sub>2</sub><sup>®</sup>

Make your mobile activity really add up.

▶ **AirClic**

## Meet the Fusion<sub>2</sub>

Serving fast-paced, dynamic field operations in the most demanding environments, the AirClic Fusion<sub>2</sub> keeps the enterprise agile and informed with real-time information. Fusion<sub>2</sub> is a fully integrated solution that combines barcode scanning, signature capture, push-to-talk, voice notes and GPS capabilities, at a fraction of the cost of competitive offerings. Fusion<sub>2</sub> is an excellent value in integrated mobile solutions, delivering increased productivity by easily capturing, tracking and distributing real-time information from the field back to the office.

## Benefits of the Fusion<sub>2</sub>

**Ease of use:** A high-resolution handset screen and intuitive user interface makes the Fusion<sub>2</sub> easy to learn and navigate.

**Improved real-time communications:** With voice notes, GPS capabilities, signature capture and push-to-talk, stakeholder communications and customer service levels are heightened when data is captured in real time on the Fusion<sub>2</sub> handset and communicated to the backend AirClic MP platform.

**Insightful performance management:** The ability to reliably capture accurate, real-time data in the field — and manage that data — supports business process improvement and performance management initiatives.

**Reliability:** Consistency and service performance are ensured with AirClic, a premier mobile solutions provider, and the best-in-class AT&T 3G network, capable of simultaneous voice and data communication.

**Modular Design:** The device cradle can be replaced to accommodate various handset models to lower the total cost of ownership and minimize interruption when equipment is upgraded.

## Fusion<sub>2</sub> in the Field

From basic tasks to fulfill a service level agreement or for providing value-added services to your customers that increase your revenue, the ways to use the Fusion<sub>2</sub> are limitless and apply to any business process. Consider these examples:

**Logistics and delivery:** From proof of delivery with electronic signature capture to enhanced driver and route management with location-based services, Fusion<sub>2</sub> makes it happen. Reroutes, modified or canceled orders, special delivery instructions or other changes can be communicated — and acted upon — in an instant.

**Field services:** Scanning parts used during a service call for invoicing and stock replenishment, sending voice notes to an electronic case file, recording time on a job for billing and capturing proof of service information are among the many tasks performed by the Fusion<sub>2</sub>.

**Inventory and asset management:** Tracking goods in the warehouse, parts on the shop floor or managing more complex transactions such as vendor managed inventory programs are accomplished with ease.

## Fusion<sub>2</sub> Device Features

The Fusion<sub>2</sub>'s modular design includes an AirClic MP-enabled Samsung A657 handset and sled which includes the barcode scanner, signature pad and writing stylus, all connected by Bluetooth® wireless technology.

## Key Fusion<sub>2</sub> Features at a Glance

- AirClic electronic signature, barcode scanning, push-to-talk and GPS capabilities
- Optimized battery for 12+ hours on a single charge
- Military Standard MIL-STD-810F certified Samsung A657 handset with rugged casing to protect the unit against extreme weather conditions and temperatures.
- LED-light device status indicators
- Wall charger
- One-year limited warranty

## Optional accessories

- Vehicle charger
- High-performance multi-unit docking station
- Carry case
- Dashmount holder
- Extra styli
- Charging adapter

## Requirements

- Samsung A657 handset
- AT&T data or data/voice plan
- AirClic MP software license
